Kim 25

Kenny 32

Katie 21

Kev 46

Tim was wrong. He should have used 3 bundles of 10 straws and 4 single straws. He had swapped them around (4 bundles of 10 and 3 single straws).

He could have counted 25, 26, 27, 28 or 29.

It is right. There are 3 bundles of 10 of straws (more than 2 bundles of 10) and 5 single straws.

- | | | |
|--|--|--|
| 42 <input type="checkbox"/> | 36 <input checked="" type="checkbox"/> | 24 <input checked="" type="checkbox"/> |
| 38 <input checked="" type="checkbox"/> | 31 <input checked="" type="checkbox"/> | 19 <input type="checkbox"/> |

When counting backwards, 42 would be before the starting number and 18 after the end number.

5 numbers: 31, 34, 38, 43, 48
