Set up an estimation station.

Ask a helper to fill containers with different amounts of objects.

| Key Questions |
| --- |
| How many objects do you think there are? |
| Do you think there are more than 10 or fewer than 10? |
| How could you check? |

Place the objects onto 10 frames to check how many there are.

How close was your estimate?

White Rose Maths

Here are some ten frames that you could use to help you to see how many objects there are.
