

Mu Approves!

Firstly, I believe, aliens should not be enslaved because they are innocent and helpless creatures. Who would want to take them away from their home and their family? It would not be right!

There's another reason why we should not lock them away and keep them as pets. Here, on Earth, we need air to breathe but the aliens might really struggle with it since we do not know what their planet has. It may be that they need something more than what we have to offer.
